AI ENGINEERING MANAGER

SUMMARY

Applied AI leader with 10+ years of experience in NLP and Machine Learning. Proven record of translating research into impactful products and scaling AI capabilities across organisations. Dedicated to building high-trust, growth-oriented teams that deliver measurable value.

LEADERSHIP HIGHLIGHTS

- Proven track record of aligning AI capabilities with product goals to deliver measurable value.
- Built and scaled AI teams (up to six people), fostering a culture of innovation and trust.
- Strong communicator, bridging scientific insight, leadership, and product strategy.

MAJOR PROJECTS

Lokalise AI

2025-

Built Lokalise's next generation of AI-driven translation quality systems, improving overall translation acceptance by 10 percentage points and doubling AI-processed word volume YoY.

- Delivered RAG translation features, achieving 95% acceptance in beta, driving strong customer adoption.
- Built an MQM-based scoring framework enabling quality-aware workflows and forming the basis for an agent under development.
- Introduced rigorous testing, evaluation, and deployment practices, turning early research into a reliable production system.

Note Assistant

2019-2022

Led a cross-functional team delivering a real-time consultation summarisation system for Babylon's Clinical Portal, reducing documentation time by 17%.

- Designed and deployed production NLP models under strict clinical safety and privacy constraints.
- Improved human evaluation reliability by 50% through better model design and process automation.
- Applied a double-diamond design approach to optimise clinician experience and workflow efficiency.
- Co-supervised a Babylon-funded PhD focused on applied summarisation research.

EDUCATION

University of Sussex
PhD in Clinical NLP, 2012-2015

University of Tübingen
BA & MA in Computational Linguistics, 2003-2009

TECHNOLOGIES

ML • Huggingface • PyTorch • deepspeed • Keras
Python • spaCy • NLTK • FastAPI • Flask • Cython
CI • Docker • Kubernetes • CircleCI • GitHub Actions
Data • MySQL • PostgreSQL • Redis • Kafka • MongoDB
Cloud • AWS • GCP

EXPERIENCE

AI Engineering Manager

Lokalise, March 2025 until present

Lead the AI team developing AI-powered translation and quality intelligence systems. Introduced rigorous testing, LLM observability, and A/B experimentation frameworks, strengthening reliability, transparency, and data-driven iteration. Embedded a culture of operational excellence and continuous improvement across the domain.

Head of AI

JABS MedTech, May 2023 to Dec 2024

Defined and led the company's AI strategy and product validation efforts, building a clinical AI platform and exploring clinician adoption and trust. Established foundations for safe, explainable AI in healthcare workflows before the company pivoted toward a medico-legal focus.

Applied AI Research Manager

Babylon Health, Jun 2019 to Dec 2022

Aligned Babylon's AI research with product delivery, promoting an end-to-end ownership model for AI services. Implemented product design best practices across development, improving reliability and clinical value. Led initiatives that strengthened collaboration between research and product teams.

Senior NLP Scientist

Babylon Health, Dec 2018 to May 2019

Led the NLP squad supporting Babylon's Chatbot through Information Extraction and Intent Recognition systems. Laid the foundation for the Speech Processing project, which expanded the company's conversational AI capabilities.

NLP Scientist

Babylon Health, Feb 2017 to Nov 2018

Modernised Babylon's Information Extraction stack, migrating it to Python and integrating state-of-the-art NLP technologies. Designed the hiring process for the NLP team, shaping its early growth and technical standards.

Data Scientist

Datamaran, Sep 2015 to Jan 2017

Delivered a news analytics streaming pipeline for the Datamaran platform.

Research Assisstant

Bulgarian Academy of Sciences, Apr 2010 to Dec 2011
